

# CHAIN TENSIONER

<b>MOULDED MATERIAL</b>	PA46 (glass fiber)
<b>FAMILY OF MATERIALS</b>	PA 6 ; PA11 ; PA 12 ; PA 46 ; PA 66 ; PA 69 ; PA 610 ; PA 612 ; PA 6-3-T ; PA 6 I ; PA 6 T ; PA-PDA (Polyamides) also with reinforced and filled additives, impact modified and self-extinguishing.
<b>POLYMER'S FEATURES</b>	<ul style="list-style-type: none"> <li>High mechanical strength, stiffness, hardness and toughness</li> <li>Good fatigue resistance</li> <li>Good sliding properties</li> <li>Excellent wear resistance</li> <li>Good electrical isolating properties</li> <li>Good processing in the machine tools</li> </ul>
<b>APPLICATION FIELDS</b>	Almost any, in this case, the shoe requires high resistance to abrasion and chemical resistance, low friction coefficient, good mechanical strength at high temperatures
<b>SPECIAL NOTES</b>
