

CHAIN TENSIONER_2

MOULDED MATERIAL	PA 46 (glass fiber)
FAMILY OF MATERIALS	PA 6 ; PA11 ; PA 12 ; PA 46 ; PA 66 ; PA 69 ; PA 610 ; PA 612 ; PA 6-3-T; PA 6 I ; PA 6 T ; PA-PDA (Polyamides) also with reinforced and filled additives, impact modified and self-extinguishing.
POLYMER'S FEATURES	High mechanical strength, stiffness, hardness and toughness Good fatigue resistance Good sliding properties Excellent wear resistance Good electrical isolating properties Good processing in the machine tools
APPLICATION FIELDS	Almost any, in this case, the shoe requires high resistance to abrasion and chemical resistance, low friction coefficient, good mechanical strength at high temperatures
SPECIAL NOTES
